

What is Find Help?

United Way of Lake County is proud to provide Find Help Lake County (Find Help) free of charge to our local community. Find Help is the only single point of access that connects Lake County, IL residents with local, non-profit health and human service providers that address the physical, emotional, mental, economic, social well-being, and educational needs of individuals in our community. Information on these local services is available through our online searchable database, www.FindHelpLakeCounty.org. Find Help also provides information on local volunteer and product donation opportunities.

Why is United Way Transforming Find Help Lake County?

In 2017, Find Help Lake County successfully connected over 35,000 individuals in Lake County with information on local health and human service providers through the website and previous Find Help Guide. Unfortunately, Find Help cannot provide personal navigation through resources during times of crisis and some individuals cannot access information at all due to limited internet access. As a result, many organizations still get misdirected calls that forces them to redirect traffic and prevents them from focusing on their mission.

United Way is committed to solving these challenges by implementing 2-1-1. Once implemented locally all 703,047 residents of Lake County would have access to the personalized navigation of resources through 2-1-1.

2-1-1 Cannot Happen Without Your Help

United Way understands the importance of community partnerships. We know we cannot implement 2-1-1 alone. Working together with you we can provide this vital service and ensure that all 703,000 of individuals in Lake County have access to critical information and resources regardless of the time of the day, the language they speak, or where they live. Working together we can create a 2-1-1 system in Lake County that will transform the way individuals get help.

Help support 2-1-1 implementation in Lake County!
